ADDITIONAL INFORMATION

Projects - Bachelor Thesis about assigning badges in online communities. I am creating backend for an universal tool that could effectively evaluate which badges should be granted to users based on their activity in the system and the predefined rules. The tool is implemented as web service in Java, communicating through simple REST API.

- School project in Java using JBoss, Hibernate and Oracle Database. The project was about recipe book, user could define ingredients and create recipes. He could also search using filters and export the book as .pdf. Application was divided into server and client side. Both were implemented in Java, communicating through Enterprise JavaBeans.

- Several 2D games in pure Java or LibGDX framework that I was working on in my free time. One of them is published on the site http://gamejolt.com/games/selfish/42982

Hobbies   - Games, both playing and developing

- Music (playing bassguitar in the band)

- Living history and historical reenactment

- Hiking and Nature
